

Mini Science Test

Class 10 | Time: 30 Minutes | Maximum Marks: 17

General Instructions: This paper has two sections. Section A has 3 questions of 2 marks each. Section B has 3 questions of 3 marks each.

SECTION A

Q1. What is the chemical formula of common salt? Name the type of chemical bond present in it.

Q2. State one difference between a physical change and a chemical change, with one example of each.

Q3. Define photosynthesis. Write the balanced chemical equation for the process.

SECTION B

Q4. A concave mirror produces a real, inverted image of magnification -2 for an object placed 15 cm in front of it. Find the position of the image.

Q5. (a) State Ohm's Law.

(b) A resistor of 10 ohm is connected to a battery of 5V. Calculate the current flowing through it.

Q6. Explain the process of respiration in human beings. Name the main organs involved.
